## **DETAILED ACTION**

### ***Amendment***

1. Receipt is acknowledged of the amendment filed 10 June 2005.

### ***Allowable Subject Matter***

2. Claims 2-5, 7-10, and 12-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of record of Cadotte fails to teach the specific system, method, and program that reads out function numbers in sales data that is stored in a memory unit, and then collates them with function numbers in a depressing limit master stored in the memory unit, and if they are coincided, adding 1 to a limit counter of the depressed function key corresponding to the function number, comparing a value of the limit counter of the function key corresponding to the function number with the corresponding limit count in the depressing limit master, and sending to a host computer that the depressing of the key corresponding to the function number exceeds the limit count if the value of the limit counter exceeds the limit count. Hence the best prior art of record fails to teach the invention as set forth in claims 2-5, 7-10, and 12-15, and the examiner can find no teaching of the keystroke trapping system, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 10 June 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2876

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
